## FOREWORD

At Lupin, we are guided at all times by our promise of caring for our customers' health and well-being. To achieve this objective, we have invested in research, continuous learning and technology to develop high quality and affordable medicines to address unmet patient needs.

Lupin ranks amongst the top 5 players in the Indian pharmaceutical industry and enjoys the reputation of being amongst the best in terms of quality.

This is the 17<sup>th</sup> year since Lupin's foray into Generics, starting in 2004. We have grown from a small, nimble business into a formidable business in Generics.

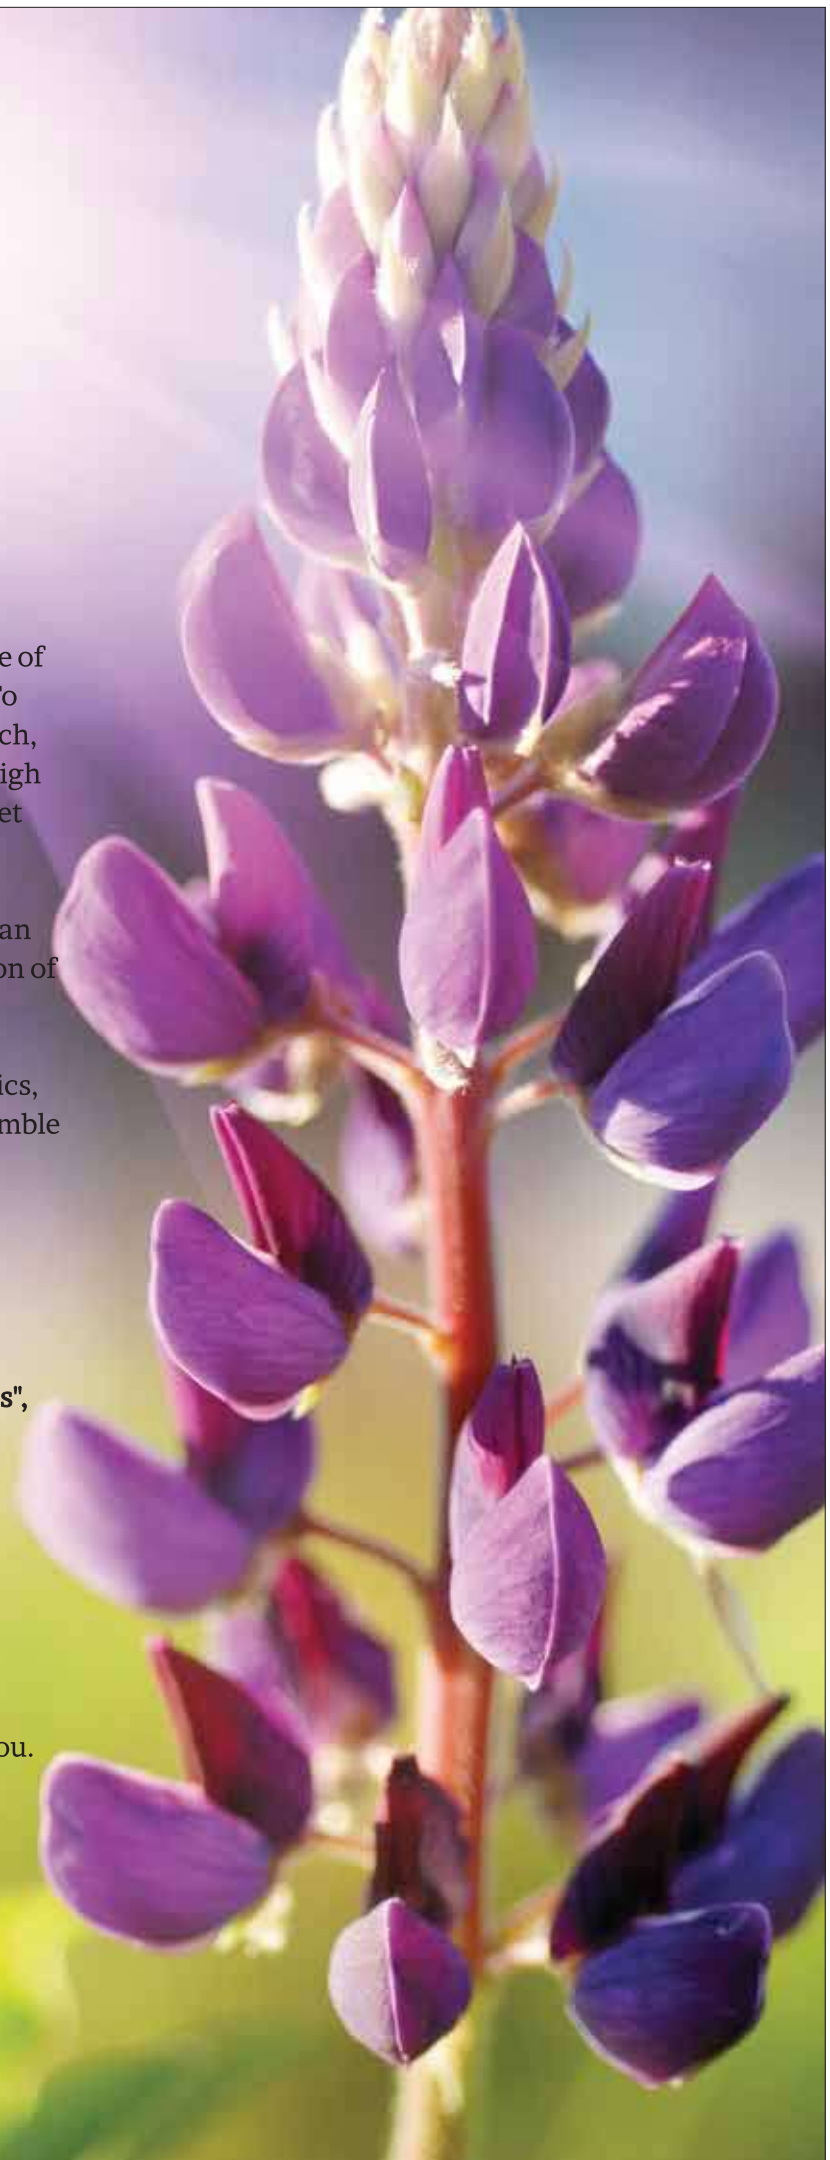

In Mass Marketing business, we strictly comply with the same Quality standards as in our other therapies and geographies.

We are proud to be the "**Gold Standard in Generics**", our products are stable throughout their shelf-lives, under prescribed storage conditions.

Our strength lies in our heritage and our values. We believe in creating a healthier, happier world through our medicines across diverse therapies.

Each time you dispense our products, we are reminded of the trust that your patients have in you.

With Lupin products, that trust & assurance will always be with you and continue to give you that same satisfaction and peace of mind, you have experienced, thus far.

**Dr. Desh Bandhu Gupta**  
Founder & Chairman,  
Lupin Ltd

“ We are one of the privileged few that have fundamentals in place to shape a better future for society, to make the world healthier and happier. To build a better tomorrow. We embrace this not as a responsibility but as an obligation. ”

**Mr. Nilesh Gupta**  
Chair Quality Forum,  
Indian Pharmaceutical Alliance  
and Managing Director, Lupin Ltd

“ We are proud to be based out of India; as we have shown during the COVID 19 pandemic, we are truly the pharmacy of the world. Our actions are in line with responsible market leaders. When it comes to the quality, while there is considerable improvement, there is more work to be done. For this, the theme of the forum continues to patient centricity - we firmly believe that keeping patients front and center is not just critical, but will also enable us to rise to be global benchmark in quality and compliance. ”
